

Once the first round of remote learning activities was completed at Gulahatti Kaval, facilitators found that students were again going back to not having anything to keep them engaged. Having this challenge posed before them, our facilitators Sunitha and Uma decided to contact the program team. Along with the team they came up with additional activities for children to do during this time.

These activities really intrigued the children, and they were extremely excited to do them. Our woman facilitators over the years have gone beyond what is expected of them, always centring the needs of our children. Their passion towards providing enriching learning spaces has led them to constantly brainstorm for creative ideas and deliver it to our children.
