

D. has been a fascinating child. His Facilitators at GHPS Kaggalahalli have been a strong support system in helping him understand activities and doing them regularly. Here is what they say about him.

“D’s eyes were sparkling with enthusiasm on receiving the art kit. However, when the activities would be sent, he would rarely complete them. This really worried us.

On visiting his house one time and talking to him we realised that he was not able to fully understand what he had to do in the activities.

After watching us demonstrate the activities in detail, D felt a lot more confident. Then onwards he would try to do his activities independently and would make sure he got frequent feedback from us.

As Facilitators we feel immensely proud to have instilled such a keen interest for learning in D.”
