

### ACTIVITY 11: Sketching Seeds

**Age:** 6 years and above.

**Materials:** A4 sheet, pencil, different types of seeds

#### Steps:

1. Go for a walk near your home and find different kinds of seeds fallen on the ground. You can also look in your kitchen for some seeds.
2. Observe the seeds closely and notice details in each seed. What are the different shapes, sizes, textures, patterns, and colours you notice?
3. Choose any one seed and make a sketch by closely observing the seed. Start with the overall shape of the seed and then add details like marks and patterns.
4. Once you finish, share/note down what was interesting and what were the new observations you made? What did you learn about seeds? How are the seeds different from the other?
5. Try sketching a few more seeds that are different from the first seed.
