

## ACTIVITY 11: CREATE A 3D LANDSCAPE SCULPTURE – MY STREET

**Age:** 6yrs and above

**Materials:**

Various materials from around the house: Empty boxes, utensils, plastic bottles, containers, scrap paper etc.

**Points to keep in mind:**

1. If possible, find a partner who can work with you, a sibling or a family member.
2. You can work together for this activity and create one sculpture.
3. Stand at the front of your house, and notice your street.
4. What kind of houses and buildings are there? What about plants and trees?
5. Are there any animals on the streets? Any vehicles? Notice all that is there.
6. Go around the house and find materials that you can use to create a model of your street?
7. Think about what shapes make up the things on the street you see? Stack the objects, lean them against a wall, balance them, attach them, and create a model of your street.
8. You can use smaller objects and scrap paper to add more details to your street model sculpture.

## Points to consider when working with your partner

1. Always work collaboratively and respect and include each other's ideas.
2. Work together to create the sculpture of your street.
