

Arts Integrated Sessions – 5th Std.

Subject – Mathematics

Chapter – Addition and Subtraction

Art Medium – Oil Pastel

Session Plan –

Session 1– Oil Pastel Exploration

Academic Goals in this session –

- For students to revisit the concept of addition and subtraction.

Art Goals in this session –

- For students to develop investigation skills through exploration and experimentation of oil pastels.

Materials –

- Oil Pastel (1 box shared by 4 students)
- Oil Pastel Tools (plastic spoon, fork, toothpick, bubble wrap, rope, thread etc.)
- Black construction paper (1 sheet divided into 4 pieces, 1 piece for 1 child)

Activity –

Introduction

Time – 5 minutes

- Tell the students we are going to be working with oil pastels today.
- Talk to them about the difference between oil pastel and crayons.

Demonstration

Time – 10 minutes

- Demonstrate for the students exploring the medium of oil pastels through blending colour – in which you add one colour with another to create new colours.
- Demonstrate making various kinds of marks, you can demonstrate additive marks. Showing you can add marks to the explorations.
- Similarly show subtracting marks using tools.
- Demonstrate for student using various sharp objects for exploring marks and textured surfaces.

- Tell students they are free to test all the techniques and encourage them to come up with something new too.

Working Period

Time – 20 minutes

- Distribute all materials required for students to begin their explorations.
- Go around the class and encourage them to use the material in various ways.

Reflection

Time – 10 minutes

- Place the artworks in the centre for everyone to observe.
- Share some of the students' explorations with the class.
- Have a discussion with students on the concepts of addition and subtraction through the explorations made by the students.
